CORE COMPETENCIES

- Software Development Lifecycle
- Application Support & Maintenance
- Agile/Waterfall Methodology
- Relational Database Design
- Unit Testing and Bug Fixes

PROFILE SUMMARY

- **Senior Software Engineer** with **10.6+ years** of successful career by commendable performance in **C#.Net, ASP.NET Core, EF Core, REST Web API, React JS, Nest JS, Angular 19, Node JS, SQL Server, Java Script, jQuery, Apache NIFI.**
- Designed and developed N-tire web, windows using **ASP.NET core, Angular** as front end and securing using **JWT token.**
- Hands on and implemented MVC core concepts like **Dependency injection, Middleware** and **Session management techniques.**
- Good in GOF design patterns implemented patterns like **Singleton, Mediator, Adapter, Factory, and Repository.**
- Skilled in developing systems built on **SQL Server using Tables, Triggers, Views, Functions** and **Stored Procedures** and **maintaining the database, including requirement analysis, design.**
- Experience of working on all phases of System Development Life Cycle (SDLC) using Waterfall and Agile SCRUM based development methodologies.
- Capability of managing projects end to end right from requirement to design and implementation.

SKILLS

Technologies	C#.Net, React JS, Nest JS, Angular 19, Node JS, ASP.Net Core, ASP.Net, ASP.Net MVC, EF Core, ADO.Net, JavaScript, HTML, CSS, AJAX, .NET CORE, Web API, Prisma, Mongo DB and jQuery, GIT, Microsoft Azure, Apache NIFI.
Extras	Web Services, Windows services, LINQ, Design Patterns.
RDBMS	SQL Server
IDE	Visual studio and VS Code
Others	UML (Microsoft Visio), MS Office

ORGANIZATIONAL EXPERIENCE

- **Virtusa Consulting Private Limited, Hyderabad** from July 2025 to Till Date
- **EPIQ Systems India Private Limited, Hyderabad** from April 2022 to July 2025.
- **Aspire Systems India Private Limited, Hyderabad** from Nov 2018 to April 2022.
- **Evoke Technologies, Hyderabad** from April 2017 to Nov 2018.
- **Volk Soft Technologies, Hyderabad** from July 2015 to April 2017.

ACADEMIC DETAILS

MTech in Computer Science and Engineering (2012-2014) from Vaagdevi College Of Engineering, Warangal with 76.01%

BTech in Information Technology (2008-2012) from Vaagdevi College Of Engineering , Warangal with 69.94%.

Intermediate in MPC (2006-2008) from Maharshi Junior College, Warangal with 89.7%.

SSC in 2006 from Little Flower High School,Warangal with 80%.

WORK EXPERIENCE

July '25 -Till Date with Virtusa Consulting, Hyderabad

Project: QDF

Duration: July 2025- Till Date

Role: IT Consultant

Team Size: 15

Tools: C#.Net, React JS, Nest JS, Node JS, Prisma, Apache NIFI, ASP.NET Core Web API and SQL Server 2014.

Description: The QDF application is an e-commerce platform designed to enable seamless shopping for airline passengers and airline staff. The system allows users to browse products, manage carts, and complete purchases using role-based payment options. It also integrates with backend systems for inventory, pricing, flight schedules, and delivery notifications.

User Types

Staff Users

- Eligible users who are Staff.
- Access is validated through employee credentials.
- Eligible for special staff benefits and payment options.

Passengers (PAX Users)

- Customers traveling on Qatar Airways flights.
- Access linked with booking reference or ticket details.
- Can shop before flight and opt for gate delivery or other delivery models.

Responsibilities:

- Project Requirement analysis.
- Designing and developing the code using React for UI of QDF application.
- Following Agile methodology.

April '22 -July'25 with EPIQ Systems, Hyderabad

Project: ASAP Notification Process

Duration: Apr 2022- Till Date

Role: Senior Software Engineer

Team Size: 15

Tools: C#.Net, React JS, Nest JS, Node JS, Prisma, Mongo DB, ASP.NET Core Web API and SQL SERVER 2014, Microsoft Azure Services like Azure Storage, Azure Key Vault, Azure Functions, Azure SQL Database.

Description: The ASAP Notification Process provides daily monitoring of a loan portfolio to identify borrowers who have filed bankruptcy. A portfolio typically consists of all loans, or loans that are in some range of delinquency.

Results returned will not only provide account number and debtor specific information, but also a link that will take the user directly to the cover sheet or summary page of the case.

Notification Process

- The file is loaded into the system.
- The subscriber records are validated.
- The subscriber records are checked against records in the system to determine if the record is an update, insert, suspend, etc.
- The subscriber records are imported into the system.
- The records are scrubbed for matches.
- Reports are generated and delivered to the subscriber.

Responsibilities:

- Project Requirement analysis.
- Designing and developing the code using React for UI of ASAP application.
- Following Agile methodology.
- Production Support after completion of each sprint.
- Participated in Transition Sessions with OPS team to acquire knowledge on ASAP Application.

Nov '18 -Apr'22 with Aspire Systems, Hyderabad

Project: IDT

Duration: Nov 2018 to Apr 2022

Role: Module Lead

Team Size: 25

Tools: C#.NET, ASP.Net Core, Microservices, REST Web API, Angular 10, JavaScript, SQL SERVER 2014, CQRS, jQuery with Agile Methodologic

Description: Individual Decision Tool provides a fast and convenient way to quote new prospect.

Once you login you will have access to the following features

1. Interactive quoting tool that allows you to store and retrieve multiple proposals and obtain online quotes instantly.
2. Cost Analysis with contribution.
3. Start On boarding/implementation of prospects with electronic paperwork.

Responsibilities:

- Requirement analysis.
- Designing and developing code.
- Integrated the complete application and deployed in QA server.
- Team management and helped them to resolve the issues in application.
- Involved in Client meetings.
- Coordinate with release team with respect to the Dev / Production release schedules.
- Analyzing new improvements, implementations and its impact and handing over to team and get it done by team collectively.

- Worked on user stories and attended in daily scrum calls.
- Created and consumed REST Web services.
- Designed and developed various Class Libraries as per the requirement.
- Escalate the production incidents on Priority base.
- Preliminary discussion of the project with the core team.

July '17 – Nov'18 with Evoke Technologies, Hyderabad

Project: Tote Verification

Duration: Jul 2017 – Nov 2018

Role: Developer

Team Size: 10

Tools: C#.NET, ASP.Net Core, Microservices, REST Web API, SQL SERVER, Java

Script, jQuery. **Description:** Tote Verification application is used to verify whether the Tote Scan Details are matching with the Tote Scan Details section or not. If they both match it's a success case otherwise it is a failure case. This Application contains the features like Manage systems, Manage users, Tote Match Report, System Report.

KIT Sheet application is used to calculate Cost per Unit (CPU) based on different colors used by OEM for vehicle coatings.

The application got two different modules:

- o Administration
- o Ford – KIT Sheet

Based on the user roles mapped to your profile, you shall be able to access different menu structures in the application. Here, Administration module deals with managing the master data required by the application (i.e., Paint Systems/ Materials information, Users information, Vehicle Body Styles information, Part-Square Feet information, and Cost per Gallon information of different Materials) - at a particular Ford/Plant).

Whereas the KIT Sheet module deals with capturing the Inventory Received, Current Inventory, Total Cumulative Build Units, and also generating the reports like – Actual Inventory Usage report, and KIT Workup report.

Responsibilities:

- Requirement analysis and assigned work to team members.
- Involved in all the phases of SDLC i.e., Analysis, Coding, Testing and Implementation.
- Participated in daily status calls with offshore. Co-ordinate with offshore to complete the tasks as per the deadline.
- Interaction with the client and Specifications Gathering from the Client.
- Responsible for Development Phase to meet tight deadlines.
- Handling major enhancements in the project depending on the new business requirements.

July '15 – July'17 with Volk soft Technologies, Hyderabad

Project: PEERLEND

Duration: July 2015- July 2017

Role: Developer

Tools: Using C#.NET, ASP.Net MVC, SQL SERVER 2008, JavaScript, jQuery.

Description: Peer-to-Peer Lending is about individuals transacting between themselves for small ticket size personal loans, without the need to go through a financial intermediary such as a bank or any other financial institution. It is an exciting new way and a very efficient model that matches people who want to lend with people who want to borrow, giving everyone a better deal.

Responsibilities:

- Designing and developing code using latest technologies and frameworks.
- Translate design document into coding.
- Enhanced existing functionalities as per the new business requirements.
- Prepared test cases for the functionalities as per the requirements and performed unit testing.
- Involved in database design and written required stored procedures.
- Implemented reports based on SQL Reporting services 2008.
- Played a vital in Bug Fixing.
